

Marine Radar Course

May 18, 2019 08:30 AM to 6:00 PM
\$250 including textbook and workbook

This full-day course covers aspects of practical radar usage needed to get underway using your radar, including radar functions; controls and operation; limitations of radar; its use in navigation, piloting, and underway, with an emphasis on use in collision avoidance. Essential navigation rules related to radar are emphasized, with ample time for Q&A. The course will be of benefit to both power and sail cruisers, and will address radar and general related issues common to all manufacturers' products.

Instructor Larry Brandt was for many years chief radar instructor at the Starpath School of Navigation. The course features Starpath texts.
